Table of Contents

And

Surname Index

The *Table of Contents and Surname Index* was created many years ago and was bound as a book. It covers the years 1967 to 1977. The Volumes for those years had a Table of Contents, but no Surname Index. It has been scanned and each volume within the *Table of Contents and Surname Index* has been placed with the appropriate year.

1. Each separate Index contains all 4 quarters for that year. The Table of Contents is first and the Surname Index is second.
2. Note that every page has the “Year, Volume, and Number” typed at the top just under the words *The Genie*. You can use this as a guide to determine which volume and number you want to look at.
3. You can search the Index for a name and it will search all four quarters. You will have to click “next” (or the forward button next to “search”) to see subsequent searches for that year).
4. Unfortunately this is a typed document (and maybe a copy). We found that some of the letters are very faint, some are hole-punched, and some have typed over corrections as well as blemishes or blotches. So the search function does always work as expected. You might try searching for just part of a name (first or last part) OR you can just browse the index. **BUT remember if you choose to browse, you will need to browse each of the four quarters.** Even if you have to browse the index, we thought this might be easier than searching or browsing each individual volume.

We wanted to include the original information about this Index document and give credit where credit is due. It is very obvious that many people worked hard on compiling 11 years of indexing for volumes that were not previously indexed. So please take a look at the next few pages detailing how this was accomplished.

Dedicated to the men and women
who with their material and work
made the 1967 - 1977 GENIES possible

The indexing of the 1967 thru 1977 GENIES was quite a task. We feel it will be well worth the effort for our readers. It could have been achieved in various ways, none easy. Much deliberation was made before deciding to use this format, not only for its simplicity, but the man-hours it takes for a project as large as this. None of the work was copied, indexed or printed professionally, thus keeping the cost down.

Each quarterly is indexed separately. January of each year has a pink table of contents; April, July, and October is white. Thus, each year starts with a pink Table of Contents. The surnames for that quarterly will be listed after each Table of Contents, thereby, keeping location and surname together. All are combined numerically in one volume.

In indexing these GENIES we found a wealth of information for the beginner, as well as for the more astute researchers.

This project helped each of us who worked on it share a new insight on many of our more complex genealogical problems.

This should be an invaluable tool in Arkansas, Louisiana and Texas genealogical research, as well as other states.

Back issues can be ordered for \$3.00 each. All GENIES published from 1977 are indexed individually.
